blauerht.com

2018

Da oltre 60 anni Blauer è il marchio leader in America nel campo delle forniture di capi tecnici a tutti i corpi di polizia ed ad alcuni settori scelti dell'esercito, ufficiali della U.S. Navy o i corpi speciali posti a protezione della White House a Washington. La costante attenzione verso la funzionalità dei capi e l'innovazione stilistica e tecnologica ha consentito a Blauer di conquistare una posizione di assoluto dominio del mercato delle divise con una quota vicina al 80%. Prima tra tutte le aziende di outerwear americane, Blauer ha introdotto gli interni in Thermolite estraibili, che rendono i capi utilizzabili per tutto l'anno. Il motto dell'azienda è "Uncompromising Performance", vale a dire "prestazioni senza compromessi". L'obiettivo principale di Blauer è infatti quello di dotare i suoi particolari clienti di veri e propri strumenti di lavoro, assolutamente affidabili anche nelle circostanze più delicate e drammatiche, questo senza mai perdere di vista il comfort e la leggerezza, Blauer costruisce i suoi capi perché divengano la prima linea di difesa contro gli elementi, per combattere il freddo, il caldo, l'acqua e il pericolo. È diventata così di gran lunga la prima scelta dei police officers americani. I capi Blauer per il mercato del fashion sono disponibili in Italia e in tutto il resto del Mondo grazie ad un accordo di licenza con FGF Industry spa e sono diretti ad un pubblico amante dei marchi tradizionali made in U.S.A., dei capi tecnici che possano vantare una storia e fregiarsi a pieno titolo dell'appellativo di "autentico-originale" pur se migliorati dal punto di vista comfort e vestibilità con l'adozione di caratteristiche e volumi indispensabili per il mercato Europeo. Successivamente è stata implementata Blauer Hi.Tech, una linea di abbigliamento all'avanguardia creata secondo criteri di tecnica, praticità e hi.performance. I materiali usati sono tecnologici, innovativi e performanti con caratteristiche di idrorepellenza, traspirabilità, impermeabilità e protezione anti-vento. Studiata per il moderno "urban traveller", Blauer Hi.Tech si ispira alla superiorità funzionale e all'innovazione tecnologica per aumentare il livello di comodità e la libertà di movimento.

Blauer Helmets è la nuova linea di caschi proposta da FGF Industry spa e distribuita attraverso una selezione dei migliori negozi specializzati del settore moto e fashion. La semplicità delle linee, le colorazioni ricercate e particolari, l'esclusività degli abbinamenti cromatici rendono questi caschi un punto di riferimento per il nuovo rider. Sicurezza, tecnica e innovazione sapientemente abbinati ad eleganza, design e passione rendono i nostri caschi dei Blauer Helmets.

From over 60 years Blauer is the leading brand in America for supplying technical garments to all Law Enforcement and to some select sectors of the U.S. Army, U.S. Navy officers or the Commando guarding the White House in Washington. The constant attention to the garments functionality and the stylistic and technical innovation has allowed Blauer to achieve a prevailing position on the market of the uniforms having a share which is near the 80%. First among all the American companies in the field of outerwear, the company has introduced Thermolite removable inside which makes the garments useful all year round. The Company "motto" is "Uncompromising Performance"! Blauer's main purpose is, in fact, to equip its special customers with just real tools, absolutely trustworthy even in the most delicate and dramatic circumstances without losing sight of comfort and lightness. Blauer manufactures the garments for becoming the first defensive line against such adverse elements as cold and hot temperatures, the water and the danger and thus becoming the first choice among American Police Officers. These garments are available in Italy and also in Europe, for the world of fashion, thanks to a license agreement with FGF INDUSTRY SPA Company and addressed to a public keen on "made in U.S.A." brands and on technical items which could boast their own history and confer upon themselves the title of "authentic-original" even if improved in comfort and fitting adopting characteristics and shapes which are necessary for the European Market. Developing the brand was created Blauer Hi.Tech a cutting edge clothing line created following technical, functional and hi performance standards. The fabrics used are technologic, innovative and performing and they have many characteristic such as proof resistant quality, transpirability, permeability and wind defense. The collection is studied for the cosmopolitan "urban traveler", Blauer Hi. Tech is inspired by functional superiority and technological innovation in order to increase the quality of comfort and the freedom of the motion..

Blauer Helmets is the new Helmets Collection created by FGF Industry Spa and presented through a selection of the best specialized shops of the motorbike and fashion world. Thanks to the line simplicity, the refined and details shades, the exclusivity of the chromatics matches, these helmets are a reference point for the new rider. Safety, technicity and innovation wisely mixed with elegance, design and passion make our helmets a "Blauer Helmets."

Sneaker HT01

Blauer Sneaker H.T. 01 is to be considered a sneaker deriving from the technical segment of the motowear protective shoes and boots. Some scaled down technical device has been added to create a high quality sneaker without disregarding the comfort and anatomic needs of the user.

RUNNING DESIGNED SOLE MADE OF EXPANDED TPU RESISTANT TO HYDROCARBON THANKS TO A SPECIAL SYSTEM OF COMPOUND INJECTION •
Excellent Rebound / Low Density TPU / Flexion resistance / Cold temperature resistance -30°C / Infinity memory without collapse / 100% recyclable material Rubber Touch.
THESE CHARACTERISTICS BROADLY EXCEED THE TESTS FOR THE SECOND LEVEL EN 13634:2010 CERTIFICATION, WHICH IS NECESSARY TO BECOME A PPE (PERSONAL PROTECTIVE EQUIPMENT) •
AND TO GUARANTEE THE NECESSARY RESISTANCE AND PROTECTION
The upper made of mesh guarantee the maximum aeration of the feet reducing the heat. / The polyurethane heel with ergonomic design contains a shock absorbing padding.
Ankle shock absorbing padding between the upper and the lining. / Semi-rigid thermoplastic parts positioned on the most vulnerable parts of the feet (malleolus).
Thermo-shaped reinforcements on heel and toe. / Removable hygienic insole. / Removable gear protection with matching colour.

TECHNICAL CHARACTERISTICS

COMPOSITION •

Upper fabric 100% PL (polyester)
Lining 100 % PES (polyester)
Microfibre details: support PL/coating PU
Sole TPU

Sneaker HT01

Blauer Sneaker H.T. 01 is to be considered a sneaker deriving from the technical segment of the motowear protective shoes and boots. Some scaled down technical device has been added to create a high quality sneaker without disregarding the comfort and anatomic needs of the user.

RUNNING DESIGNED SOLE MADE OF EXPANDED TPU RESISTANT TO HYDROCARBON THANKS TO A SPECIAL SYSTEM OF COMPOUND INJECTION •
Excellent Rebound / Low Density TPU / Flexion resistance / Cold temperature resistance -30°C / Infinity memory without collapse / 100% recyclable material Rubber Touch.
THESE CHARACTERISTICS BROADLY EXCEED THE TESTS FOR THE SECOND LEVEL EN 13634:2010 CERTIFICATION, WHICH IS NECESSARY TO BECOME A PPE (PERSONAL PROTECTIVE EQUIPMENT) •
AND TO GUARANTEE THE NECESSARY RESISTANCE AND PROTECTION
The upper made of mesh guarantee the maximum aeration of the feet reducing the heat. / The polyurethane heel with ergonomic design contains a shock absorbing padding.
Ankle shock absorbing padding between the upper and the lining. / Semi-rigid thermoplastic parts positioned on the most vulnerable parts of the feet (malleolus).
Thermo-shaped reinforcements on heel and toe. / Removable hygienic insole. / Removable gear protection with matching colour.
